

Yuan selects Mirics' FlexiTV platform for its new generation of PC TV receivers

*Leading TV tuner specialist develops USB dongle and minicard solutions for
OEM and ODM customers*

San Jose, USA - May 27th, 2010: [Mirics](#), developer of [FlexiTV™](#), the world's first commercial software-based global TV receiver, today announces that Yuan High-Tech ("Yuan") has developed TV tuner receivers based upon the FlexiTV platform. The reference platforms will target Yuan's top tier OEM customers and PC system integration partners seeking robust, production-ready USB dongle and minicard-based TV tuner solutions.

Steven Chao, CEO, Yuan, commented: "Yuan is pleased to partner with Mirics to develop the next generation of innovative PC TV solutions for its OEM and ODM customers. Yuan has a very successful 20 year history in the PC-based TV tuner segment, and Mirics' FlexiTV delivers a commercially compelling solution to overcoming flexibility and cost challenges in this growing segment."

Jay Nunez, Vice President, Worldwide Sales and Marketing, Mirics added: "Mirics is delighted to announce this partnership with Yuan to develop FlexiTV solutions. Yuan is a very experienced and highly regarded TV tuner developer for PC applications, so its selection of the FlexiTV solution is a tremendous endorsement of our ground-breaking global TV platform."

First production products from the partnership are expected to be available by the third quarter of 2010 for initial deployment in Asia, Europe and Latin America followed by global deployment before year's end.
